

Window Screens:

Screens must be Kolbe & Kolbe brand with a white frame and charcoal fiberglass screen.

How to determine the size of screens:

The windows are Kolbe & Kolbe. This can be verified by a looking at the instruction label in the frame of the window. It should have a "KK" logo. The only screen type made by that company for our windows has a white frame and a charcoal gray fiberglass screen material.

To determine your window size, pop out the bottom sash (bottom panel without the panes). There is a number there, such as 28 x 28.
